INTRODUCTION

This replacement guide shows how to remove this device's back panel. This step is necessary to replace many internal components of the camera.

🔧 TOOLS:

- Phillips #000 Screwdriver (1)

Step 1 — Back Panel

- Squeeze the eyepiece between your index finger and thumb and lift up and off.

Step 2

- Using the PH000 screwdriver head, remove the four 4 mm screws on the bottom of the camera.

Step 3

- Using the PH000 screwdriver head, remove the two 3mm screws on the right side of the camera (from the LCD screen).
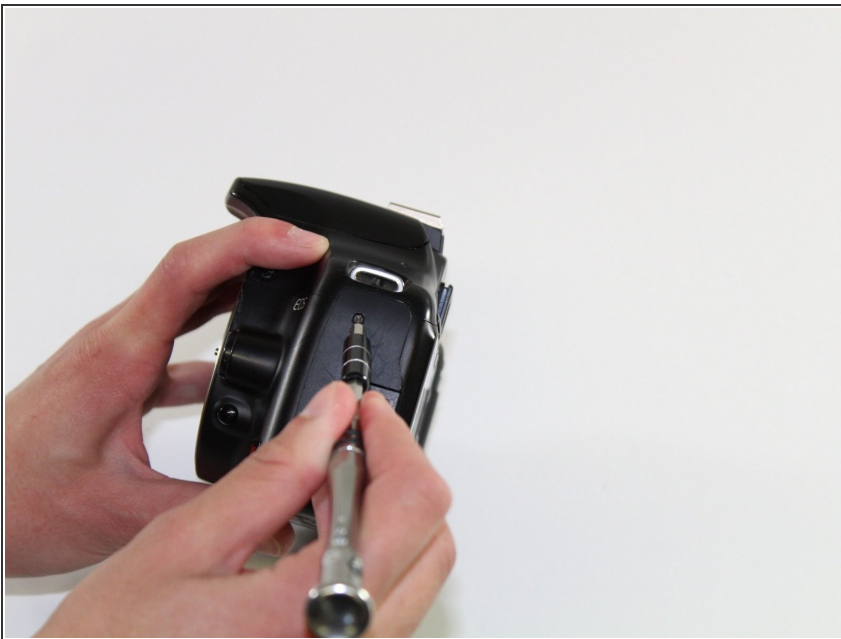

Step 4

- Remove grip by slowly peeling off.

Step 5

- Using the PH000 screwdriver, remove the four 4mm screws behind the eyepiece.

Step 6

- Using the PH000 screwdriver head, remove one 4 mm screw on the left side of the camera (from the LCD screen).

Step 7

- Remove the side panel by lifting off with fingers.

Step 8

- Use hands to pry off the back panel.

To reassemble your device, follow these instructions in reverse order.
