

# Asus Vivobook S500CA RAM Replacement

How to replace an Asus Vivobook S500CA's RAM.

Written By: Sydney Price

---

## INTRODUCTION

If your computer is running slower than you would like, use this guide to replace your RAM. This model will support up to 8GB of RAM.

---

### TOOLS:

- [Phillips Head Screwdriver: Size PH1](#) (1)
-

## Step 1 — RAM

- Turn the device over so the back plate is facing up.

## Step 2

- Use a Philips Head PH1 screwdriver to remove 10 screws around the perimeter of the back plate.
- ⓘ Place screws where they cannot be lost as they will be used to replace the back plate.

### Step 3

- Remove the back plate by lifting it straight up.

### Step 4

- Push away the tabs on the left and right sides of the RAM cartridge to release the cartridge.
- ⓘ Another pair of hands will make the process easier.

## Step 5

- Slide the cartridge directly away from its housing.
