INTRODUCTION

This is a guide to replace a malfunctioning keyboard. This guide will teach you how to unscrew your keyboard and remove the ribbon cable to allow you to replace the keyboard.

🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #0 Screwdriver (1)

This document was generated on 2020-11-20 02:45:25 PM (MST).

Step 1 — Keyboard

- Place the laptop with the screen facing you and grab the opening tool.

- Insert it into the top corner of the keyboard and slide it to the right along the length of the keyboard.
 - *You will feel the popping sensation as it slides along.*

Step 2

- Lit up the left side of the small plastic bar at the top of the keyboard.

- (i) *Be careful when removing it, because you will need to apply a bit of force .*

Step 3

- Use a PH0 screwdriver to unscrew the 4 screws at the top of the keyboard.
Step 4

- Lift up the keyboard and pull it toward the screen.

⚠ *The keyboard will still be connected to the motherboard by a ribbon cable.*

Step 5

- To remove the ribbon cable, push upward on the small tabs located on either side of the ribbon.

Step 6

- Once the ribbon is released the keyboard can be removed .

To reassemble your device, follow these instructions in reverse order.
