Step 3

- Gently pry off the bottom case with the plastic opening tools.

- Find the seam between the back case and the rest of the laptop casing.

Step 4 — RAM

- Locate the RAM cover on the back of the Laptop.

- Using the #PH0 screw head, remove 1 (5.7mm) screw.

- Use the plastic opening tool to remove the RAM cover.

Step 5

- Pull out the latches on either side.

- The RAM should pop up.

- Remove the RAM.

- Repeat for other side.

To reassemble your device, follow these instructions in reverse order.
