

Casio LK-170 Battery Replacement

This guide will walk you through the steps to replace a dead or faulty batteries in the Casio LK-170

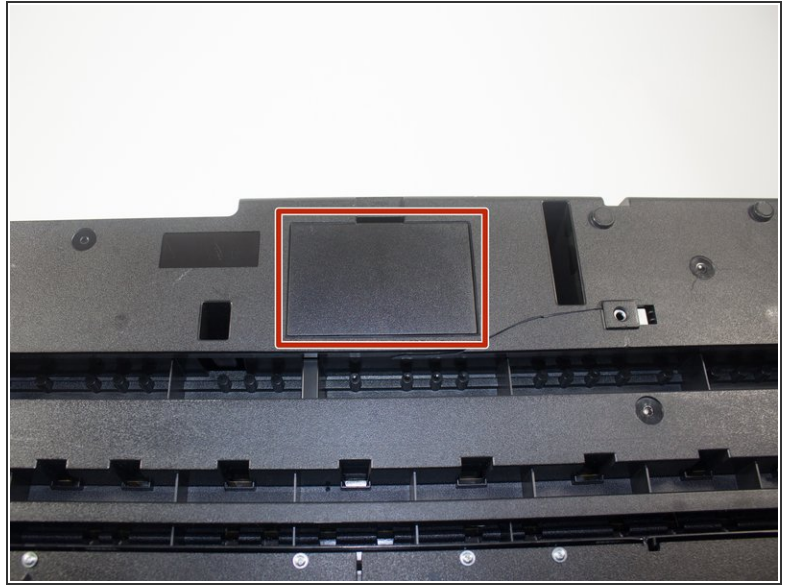

Written By: Samantha Baker

INTRODUCTION

Changing the battery will be quite simple. All you need to do is pull the tab.

Step 1 — Battery

- Locate the battery compartment on the back of the keyboard. The compartment is characterized as a small black square.

Step 2

- Use your finger to push down with a small amount of pressure on the tab protruding from the top of the battery compartment.
- Remove this compartment cover carefully with your hand to completely reveal the batteries in the compartment.

Step 3

- Pry all 6 batteries from the compartment using your thumb or index finger.
- ⓘ Make sure to remove the AA batteries from the positive side.

To reassemble your device, follow these instructions in reverse order.
