## INTRODUCTION

This is a guide on how to replace the contact pins inside of the headset.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Ear Cushion

- To remove the ear cushions, press firmly down and rotate them clockwise, it should twist about 2mm and release, allowing you to pull it off.

**i** When reassembling, be sure to line up the locking plates.

## Step 2 — Charging Contact Pins on Headset

- Use the Phillips #0 screw bit to remove the four screws (9.47 mm long) that have been revealed from removing the ear cup. Carefully take off the blue casing to reveal the audio board.

### Step 3

- Use the Phillips #00 screw bit to remove the two screws (7.92 mm long) that are holding the contact pins in place.
- Then, simply push the pins from the board.

To reassemble your device, follow these instructions in reverse order.
