

# Dyson Cinetic Big Ball Animal Upright Brushbar Replacement

This guide demonstrates how to replace the brushbar of the Dyson.

Written By: Karla Sunjara

---

## INTRODUCTION

The Dyson brushbar is located on the underside of the base of the vacuum.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Brushbar

- Lay the vacuum on its back so you can see the Dyson from underneath.

## Step 2

- Underneath the Dyson locate the red plastic tab.
- Pull out the red tab

### Step 3

- Detach the brush bar and frame from the Dyson Ball.

### Step 4

- Lay the brushbar flat as if it was vacuuming.
- Locate the two red tabs on either side of the brushbar frame.
- Lift up the red tabs and the brushbar frame will come off.

## Step 5

- Place the Dyson brushbar on its back.
- Locate the four 15mm screws in each corner of the black plastic.

## Step 6

- Unscrew the 15mm screws in all four corners of the brushbar.
- Remove the brushbar and replace it with a new brushbar.

To reassemble your device, follow these instructions in reverse order.
