INTRODUCTION

This guide will show any user how to replace the cover on a VTech InnoTab Max.

🔧 TOOLS:

- J1 Screwdriver Bit (1)
- iFixit Precision Bit Driver (1)
- iFixit Opening Tools (1)
- Magnetic Project Mat (1)

This document was generated on 2020-11-20 06:36:49 AM (MST).

Step 1 — Cover

- Remove all screw caps from the back panel using a metal spudger.

Step 2

- Next remove all of the now uncovered screws.

- (i) If there is a cartridge in the device make sure to remove it.

Step 3

- Now that all of the screws have been removed, pry the back cover off using a plastic opening tool.

Step 4

- Here you can see the back cover has been fully removed and you can now access the front cover.

- To remove the front cover, remove the springs holding the pictured brackets in place, then pull it away.

To reassemble your device, follow these instructions in reverse order.
