

Samsung Powerbot R9250 Dustbin Replacement

This guide will demonstrate the steps needed to take out and put back in the dustbin of the Samsung Powerbot R9250

Written By: Ethen Sanchez

INTRODUCTION

Outline what you are going to teach someone how to do.

Step 1 — Dustbin

- When looking at the bot from above, find the handle that says pull, on the opposite side of the cylinder that says cyclone force.

Step 2

- For stability, place one hand on the curved back edge of the bot, and place the other on this pull handle.

Step 3

- Pull the handle up and towards the back of the bot, so the dust bin begins to rotate.

Step 4

- Keep pulling until the dust pin fully releases itself from the bot.

To reassemble your device, follow these instructions in reverse order.
