INTRODUCTION

This guide will show you how to replace the keys on your HP Compaq Presario V3000 laptop.

🔧 TOOLS:

Tweezers (1)

Step 1 — Keys

- Choose the key you want to replace.

Step 2

- Insert the [tweezers](#) underneath the side of the key.

- Gently push up on the key to pop it out of place.

Step 3

- If the black groove is presen, the individual key is possible to replace.

- If the black groove is missing, the full keyboard must be replaced. Or, a new black suction groove can be glued on carefully.

Step 4

- Put the new key on the groove.

- Press down until the new key clicks into place.

To reassemble your device, follow these instructions in reverse order.
