Dell XPS 13 L321X Battery Replacement

Battery not lasting long or completely dead?...

Written By: Ahmad EL Herbawi

INTRODUCTION

Battery not lasting long or completely dead? Replace it (only screwdrivers required).

🔧 **TOOLS:**

T4 Torx Screwdriver (1)
Phillips #00 Screwdriver (1)
iFixit Opening Tool (1)

Step 1 — Battery

- Remove ten 3mm screws from the back cover with a **T5** screwdriver.

Step 2

- Disconnect the ribbon cable with a plastic iFixit opening tool by lifting up the black clip and pulling the white ribbon off.

- Pull aside the ribbon cable.

Step 3

- Insert a plastic iFixit opening tool in between the port and the wires to remove the battery cable.

Step 4

- Take out 8 silver screws that are holding the battery with a **PH00** head screwdriver.

- Six 3mm screws.

- Two 5mm screws.

- Lift the battery out.
