

Samsung 351U Keyboard Key Replacement

One of your keys may not be responding or are stuck on your Samsung 351U.

Written By: Melvin Nelson

INTRODUCTION

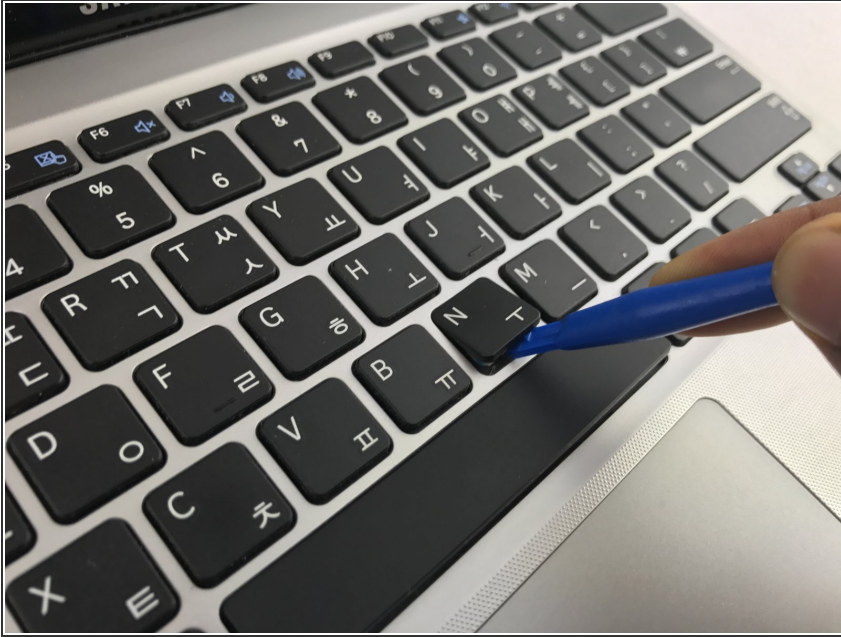

Here we will walk you through replacing one of your keys.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Keyboard Key

- Select the key you would like to remove then slide the plastic opening tool beneath it until you hear a pop.

Step 2

- The key is now out and ready to be removed/replaced.
- Be sure to only remove one key at a time so they will be in the same place as they were.
- ★ Clean the key and replace it into the same spot until another pop is heard.

To reassemble your device, follow these instructions in reverse order.
