

Sony Xperia Z3 Battery Replacement

Use this guide to replace the old battery in...

Written By: Dominik Schnabelrauch

INTRODUCTION

Use this guide to replace the old battery in your Sony Xperia Z3.

TOOLS:

iOpener (1)
Suction Handle (1)
iFixit Opening Picks (Set of 6) (1)
Tweezers (1)
Spudger (1)

PARTS:

Sony Xperia Z3 Battery (1)
Sony Xperia Z3 NFC Antenna (1)

Step 1 — Back Cover

- Heat the back cover of your Xperia Z3 to loosen the adhesive underneath.
 - ⓘ If you use an iOpener, follow these [instructions](#) for use.
- Lift up the back cover with a suction handle and put an opening pick in the gap.
- Move the pick carefully around the edges to loosen the adhesive on every side of the phone.

 Don't put the pick in too deep under the back cover to not damage any parts inside the phone.

Step 2

- ⓘ There are two adhesive strips in the center of the phone connecting the rear case to the battery, you'll need to remove them to open the phone.
- When the edges of the cover are free from adhesive, tilt it to allow access to the battery tabs.
 - Use tweezers to pull the two black adhesive strips out of the phone but don't pull just yet.

Step 3

- Gently pull out both of the adhesive tabs out of the phone, parallel to the rear cover.
- ① If the adhesive tabs break, try to use a thin flat plastic tool such as a [plastic card](#) to remove the last of the adhesive. If the adhesive is stubborn, heat it with an iOpener or hair dryer and pry again.

Step 4

- After pulling out the adhesive tabs, you can lift the back cover and remove it.

Step 5 — Battery

- Unplug the battery flex connector.
- Use a tweezer to gently pull off the adhesive strip on the bottom part of the battery.

Step 6

- Use a spudger on the left side of the frame to lever out the battery.
⚠ Be careful with the spudger - there are cables beneath the battery!
- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
