
INTRODUCTION

The DEEBOT D35's battery is completely sealed in a plastic casing. You can replace the battery by purchasing a new battery casing.

TOOLS:

- [Magnetic Project Mat](#) (1)
 - [Phillips Head Screwdriver: Size PH1](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

- Press and hold the tabs on both sides of the battery.

Step 2

- Remove the battery from the Deebot

Step 3

- Remove the screw attaching the battery housing.

Step 4

- Inert the new battery casing into the housing.
- Replace the screw attaching the housing.
- Replace the batter housing in the Deebot.

To reassemble your device, follow these instructions in reverse order.
