

# Bem Wireless HL2739B Speaker Motherboard Replacement

This guide will help you replace the motherboard on your Bem Wireless HL2739B speaker.

Written By: Ryan McQueeney

---

## INTRODUCTION

Is your speaker not working but still holding a charge? It's probably your motherboard. Follow this guide to replace it.

---

### TOOLS:

- [Metal Spudger](#) (1)
- [Tweezers](#) (1)

Flat

- [iFixit Opening Tools](#) (1)
  - [J1 Screwdriver Bit](#) (1)
-

## Step 1 — Speaker Battery

- Peel the rubber cover back from the corner of the speaker to reveal the screw.
- Repeat for the three remaining corners.

## Step 2

- Use the J1 bit attached to the screwdriver to remove the four 10mm screws from the bottom of the speaker.

### Step 3

- Lift the bottom cover away from the rest of the speaker.
- ⚠ There are wires connecting the battery and cover to the rest of the speaker. Be careful when removing the base cover.
- Using the tweezers, pull the wires from the speaker's internal chip.
- ⚠ Be careful not to damage the chip when you remove the wires.
- ⓘ It will likely require soldering to reassemble the speaker after this step.

### Step 4

- Using a plastic opening tool, gently pry the battery from the metal base.

## Step 5

- Using tweezers, pull the wires from the metal base connection.

## Step 6 — Speaker Motherboard

- Unscrew the four 10mm screws from the motherboard.

## Step 7

- Using tweezers, remove the blue/white and red/black wires from motherboard.

## Step 8

**⚠** Gently re-position the motherboard so you can access the bus wire connected to the speaker.

- Remove bus wire from the speaker and lift out the motherboard.

To reassemble your device, follow these instructions in reverse order.
