INTRODUCTION

For this guide, we will be replacing the RAM on a Lenovo IdeaPad U430 Touch. Once the back of the computer case is off, no tools are necessary for replacement.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

　　　　　www.iFixit.com
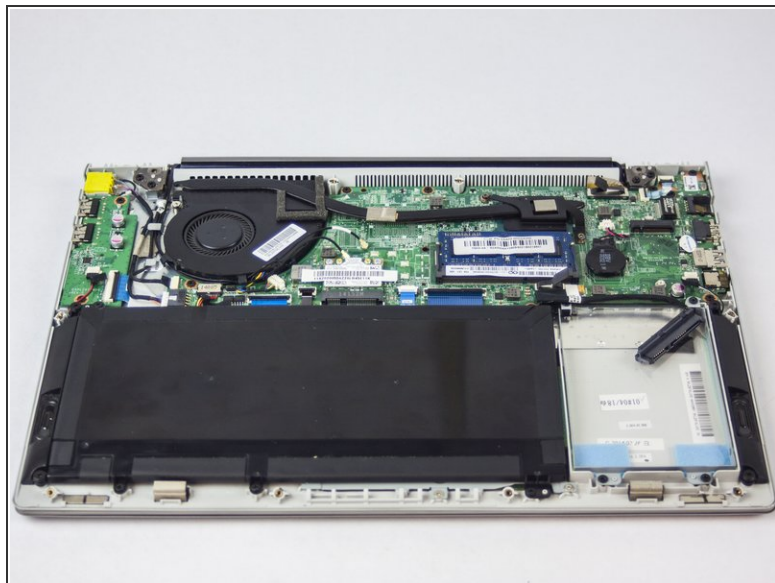

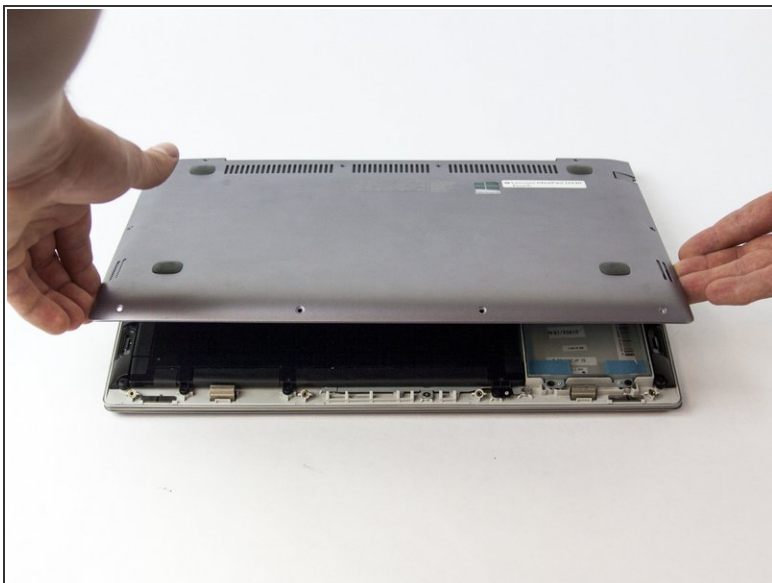

Step 1 — Bottom Cover

- Power off your computer before you begin.

- Find and remove the 10 Phillips style body screws on the bottom of the laptop case.
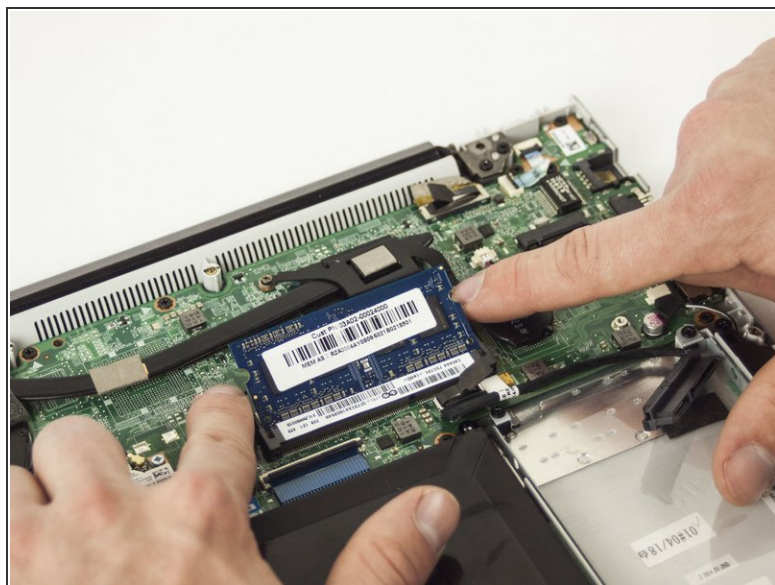

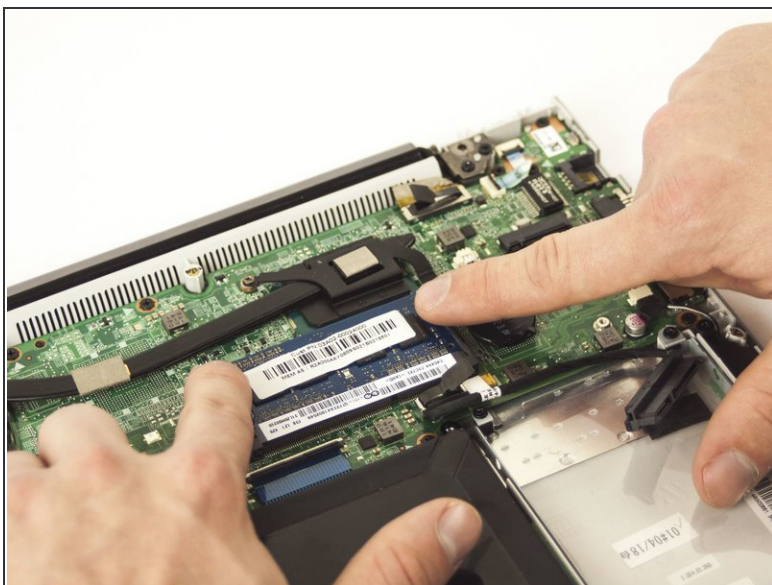

Step 2

- Remove 2 screws, 1 located on the left hinge cover and one located on the right hinge cover.

Step 3

- Starting from the front, use a plastic opening tool to separate the bottom of the case from the body of the laptop.

Step 4 — Memory

- Press down and out on the topside of the clips holding the memory in place.

Step 5

- Once the clips are free, pull the topside of the memory up, and then remove it from the slot.

To reassemble your device, follow these instructions in reverse order.
