

Fujifilm FinePix S4800 Flashbulb Replacement

This guide helps users to remove and replace the flashbulb on the Fujifilm FinePix S4800. It's located on the camera's top as a part of the flash assembly.

Written By: Lairhe Barreto Paez

INTRODUCTION

In this guide, we will be taking apart the Fujifilm FinePix S4800 to remove and replace the flashbulb. This involves taking off the rear plastic case of the camera by removing screws and using a plastic removal tool to separate the rear case from the rest of the camera and removing the LCD screen. You will then be able to remove and replace the flashbulb of your camera after removing a few more screw and desoldering the wires connected to the bulb.

TOOLS:

- [Spudger](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [JIS Driver Set](#) (1)
 - [Tweezers](#) (1)
 - [Soldering Iron](#) (1)
-

Step 1 — Battery

- ❗ Make sure that the camera is powered off before continuing.
- Rotate the camera so that the label on the base of the camera is facing up.
- On the battery compartment door, there is a slider that says "open". Slide it down and push the door to the right to release the door.

Step 2

- Remove all four batteries and set them aside.
- ★ When replacing the batteries, be sure to note the markings on the face of the battery compartment. These markings let you know which side of the battery ("+" or "-") needs to be facing up in each slot.

Step 3 — Rear Case

- Remove the three 5.0 mm JIS #000 screws on the bottom of the camera.

Step 4

- Rotate the camera so that the HDMI port is facing up.
- Remove the two 5.0 mm JIS #000 screws.

Step 5

- Rotate the camera so that the text "30x superwide 24-720mm" is facing up.
- Remove the two 5.0 mm JIS #000 screws.

Step 6

- Press the pop-up button highlighted in the picture to release the flash mechanism.
- Remove the two 5.0 mm JIS #000 screws highlighted in the picture.

Step 7

- Use a plastic opening tool to separate the rear case from the camera on each of the sides until the panel is completely separated.

 The plastic case is fragile, so take your time on each side making sure to pry each side evenly as you continue around the camera with the tool.

Step 8

- Gently, remove the rear case from the camera and set it aside.

Step 9 — LCD Screen

- ⚠ At this point, it is highly recommended that you wear an ESD wristband to prevent damage to the internal electronic components.
- ⓘ With respect to the camera that was disassembled for this guide, the LCD display easily fell out of its housing after the rear case was removed. If your screen fits more tightly, you can use a plastic removal tool to gently pry up one of the edges of the screen and that will release it from its mount.
- Gently tilt the LCD screen toward the bottom of the camera and use a spudger to flip the lock for the ZIF cable attached to the LCD.

Step 10

- Lift the screen away from the camera and set it aside.

Step 11 — Flashbulb

- Remove the two 5.0 mm JIS #000 screws highlighted in the picture.

Step 12

- Use a plastic opening tool to separate the case that covers the flashbulb.
- ⓘ The plastic case is fragile, so take your time separating the case.

Step 13

- Unsolder the connections shown in the image that connect the black, pink, white and blue wires to the bulb.
- Soldering Guide: [How To Solder and Desolder Connections](#)

Step 14

- Using a pair of ESD-safe tweezers, remove the flashbulb.

To reassemble your device, follow these instructions in reverse order.
