

# Dell Studio 1737 Back Panel Replacement

Written By: Joseph Jacavone

 **TOOLS:**

- [Mako Driver Kit - 64 Precision Bits](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Back Panel

- Unscrew the 8 Phillips head screws marked in the photo.
- ⓘ Even when the screws are fully detached, they will not come out of the panel.
  - Use a plastic opening tool to pry the panel away from the laptop body.
  - Lift the panel up and away.

To reassemble your device, follow these instructions in reverse order.
