INTRODUCTION

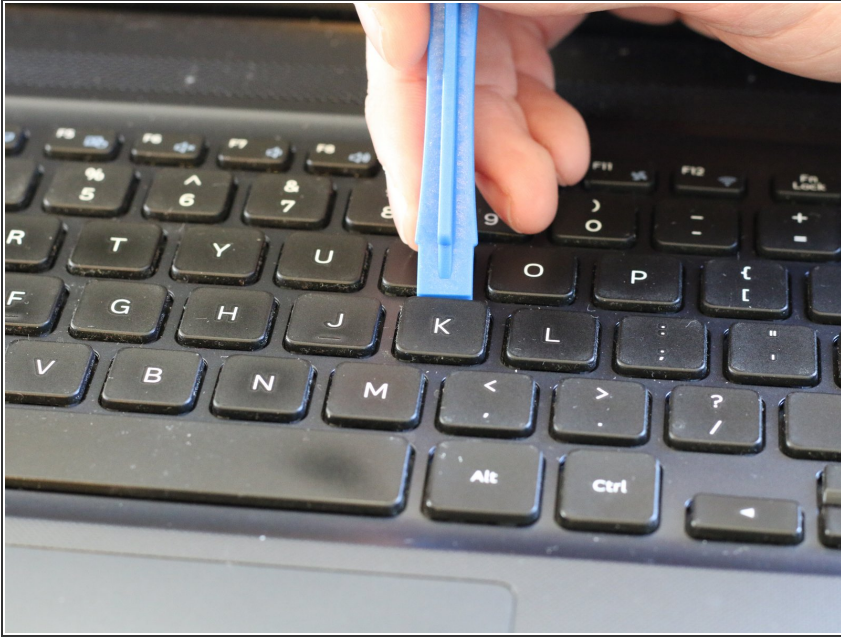

You will be guided through removing the keys on this Samsung laptops keyboard.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

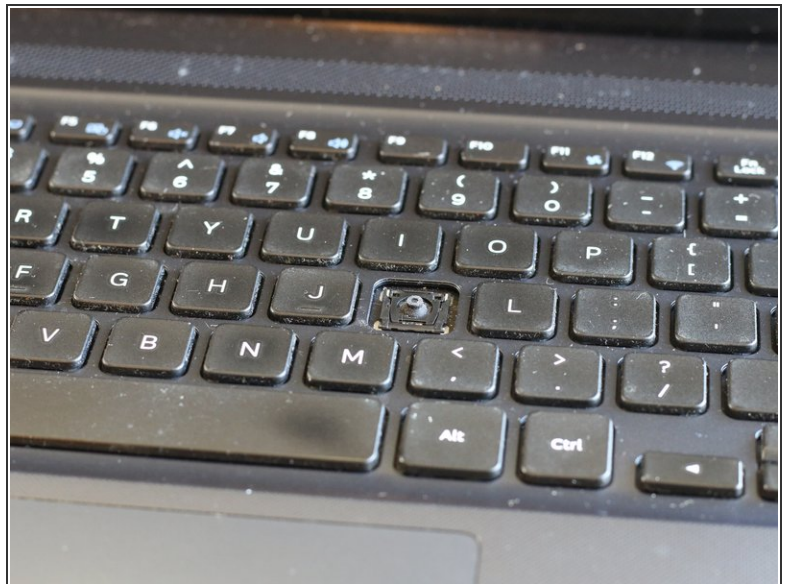

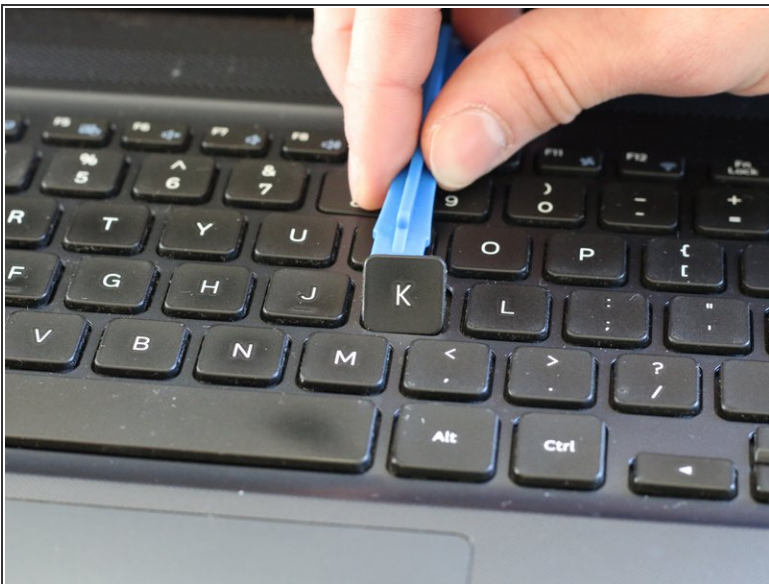

Step 1 — Keyboard Keys

- Locate the unresponsive/sticky key. With the opening tool, begin to lever the key off of the keyboard.

 Laptop should be powered off when replacing keys!

Step 2

- Pull up with the opening tool, and the key will unclip from the keyboard.
- Clean the surface under the key with a microfiber cloth if necessary.

 Do not apply too much pressure to the keys, as there is a risk of damaging them.

To reassemble your device, follow these instructions in reverse order.
