INTRODUCTION

Outline what you are going to teach someone how to do.

Step 1 — Battery

- Turn off the computer.

- Set the computer upside down with the back facing up.

Step 2

ⓘ Located directly below the bottom plate will be two switches near where the battery is located.

● With the battery facing you, slide the battery switch on the right side of the laptop towards the right.

ⓘ To ensure the switch on the right is unlocked, look for a red indicator next to the switch.
Step 3

- Slide the left battery release switch to the left.

- While holding the switch to the left, lift the battery to remove it from the computer.
Step 4

- Remove the battery.

Step 5 — RAM

- Remove the placeholder screws and pull off the backplate.

Step 6

- Carefully pull the two metal retaining clips away from the sides of the RAM module.

- ⓘ As the clips release, the RAM module should pop up at an angle.

- Remove the RAM from the device.

To reassemble your device, follow these instructions in reverse order.
