INTRODUCTION

The back panel protects the inside of your device from damage. If your back panel is broken, use this guide to replace it. Only remove this if your trying to replace something on the inside or the back panel itself.

TOOLS:

T5 Torx Screwdriver (1)

PARTS:

5CB0L46164 - Lenovo Laptop Lower Case Cover - Genuine (1)

Step 1 — Back Panel

- Make sure back panel is facing up.
- Remove eleven 5mm screws with the T5 Torx Screwdriver.

Step 2

- Lift back panel carefully.
- ☑ You can now replace back cover, making sure to match screw holes and placement of the original.

To reassemble your device, follow these instructions in reverse order.
