Step 1 — Back Cover

⚠️ Ensure your device is completely OFF before starting this guide.

● Use a Torx T4 screwdriver to unscrew the nine 5 mm screws holding the cover in place.

● Use a Torx T4 screwdriver to unscrew the 8 mm screw in the center.

📌 When, reassembling, make sure not to tighten the screws too much or you may risk cracking the plastic cover.
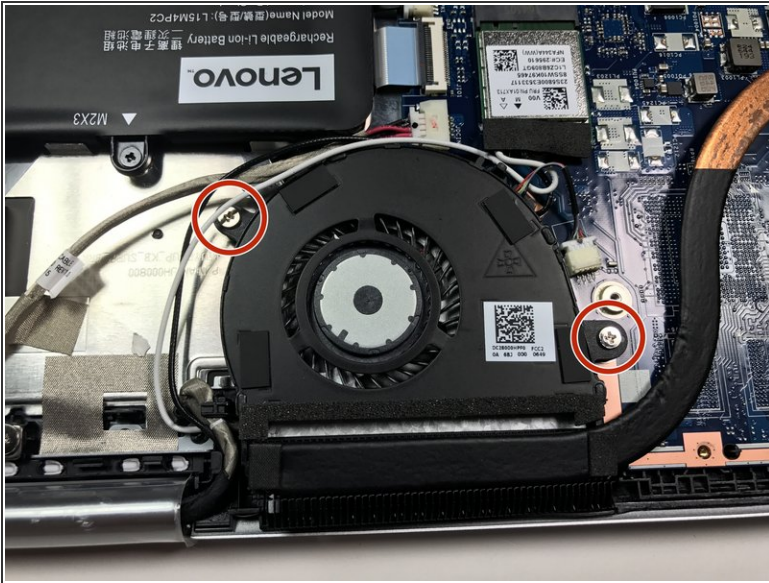

Step 2

● Use the plastic opening tool to pry the cover up and away from the laptop, starting at one end and working your way around the cover.

ⓘ The cover is large and flat and made of thin plastic. It cracks easily, so make sure not to pry too hard.

Step 3 — Fan

- Unscrew the the two 4mm Phillips #00 screws holding the fan in place.

⚠ Be careful not to break the thin plastic tabs on the fan casing.

Step 4

- Use your fingernail or a plastic tool to disconnect the fan power cable from the circuit board.

ⓘ Slide it straight out of its socket.

This document was generated on 2021-09-13 08:21:58 AM (MST).

Step 5

- Lift the fan up and out of its mount.

- ⓘ Be careful that the small plastic tabs don't get snagged on any other parts or cables.

To reassemble your device, follow these instructions in reverse order.
