

LG V20 Battery Replacement

This guide will show you how to remove the battery in the LG V20.

Written By: Garrett Janney

INTRODUCTION

Use this guide to replace the battery in the LG V20.

If your battery is swollen be extra careful. Swollen batteries can be very dangerous, so wear eye protection and exercise due caution, or take it to a professional if you're not sure how to proceed.

PARTS:

- [LG V20 Replacement Battery](#) (1)

Step 1 — Back Cover

- Press the button on the lower right side of the LG V20 to open the clamp that holds the back cover on the back side of the phone.
- Remove the back cover.

Step 2 — Battery

⚠ Before disassembling your phone, discharge the battery below 25%. A charged lithium-ion battery can catch fire and/or explode if accidentally punctured.

- Insert a spudger or your fingernail under the battery at the small recess on the lower edge.
 - Be careful not to deform or puncture the battery.
- Pry up and remove the battery.

To reassemble your device, follow these instructions in reverse order.

For optimal performance and to avoid software sided errors, **calibrate your newly installed battery** :
Drain battery below 10%, then charge uninterrupted to 100%.
