Step 1 — Back Panel

⚠ Before proceeding, power down your Chromebook. Close the display and lay it on a soft surface, top-side down.

● Remove the five 8.4 mm Phillips #0 screws.

● Remove the four 4.6 mm Phillips #0 screws.

Step 2

● Use the plastic opening tool to gently work around the edge of the Chromebook until the back panel starts to lift off.

This document was generated on 2020-11-28 05:55:21 AM (MST).

Step 3

- Remove the back panel by lifting it away from the Chromebook.

- ⓘ Some clicking will be heard as the panel is removed from the back, this is completely normal.

To reassemble your device, follow these instructions in reverse order.
