INTRODUCTION

If your Dell latitude ST is not powering on it may have a dead battery, or a broken power cord. If your battery still does not hold a charge you will need to replace your battery. This guide walks you through each step of how to replace the battery on your Dell Latitude ST if it is broken.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

This document was generated on 2020-11-28 05:55:23 AM (MST).
Step 1 — Battery

- Locate the back panel tab.

- Press down on the tab to remove the panel.

Step 2

- Using a Phillips #0 screwdriver, remove the four 6mm screws attaching the inside panel to the device.

Step 3

- Use the blue plastic opening tool to push in the tab located on the backside of the device.

- Slide the tool around the edges of the device to unsnap the tabs and pry the frame off.

Step 4

- Remove the three 6mm Phillips #0 screws attaching the battery.

Step 5

- Using your hands or a plastic opening tool, unplug the white battery cable.

⚠ Push forward on the top part of the cable to disconnect it from the device.

Step 6

- Pull up on the black tab located at the top of the battery to remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
