

Lenovo N22 Chromebook Individual Key Replacement

Through this guide you will be able to remove...

Written By: Jackson Tucker

INTRODUCTION

Through this guide you will be able to remove and replace individual keys on your keyboard. This process may be necessary if the key is not responsive to the touch.

TOOLS:

[iFixit Opening Tool](#) (1)

PARTS:

[Lenovo Chromebook 11 N22 Palmrest Keyboard](#) (1)

Step 1 — Individual Key

 **Power down the chromebook before starting this process.**

- Loosen the key by prying on the edge of the key with the plastic opening tool.

Step 2

- Remove the key from the keyboard by prying the key off with the opener or with your finger.
- ☑ The key is connected to the keyboard with two connecting plastic squares. One is connected to the keyboard by tabs and one is connected to the keyboard by snaps.
- ☑ When reassembling make sure that the two plastic square connectors are in the same place as when you removed the key.

To reassemble your device, follow these instructions in reverse order.
