Do-it-yourself fix for scratches on the AirPods...

Written By: Z.Heng

# INTRODUCTION

Do-it-yourself fix for scratches on the AirPods charging case.

---

## TOOLS:

2500目以上的细砂纸 (1)

脱脂棉 (1)

医用酒精 (1)

---

## Step 1 — How to remove scratches from an AirPods Case

 The front and back are already scarred.

## Step 2

- Use 2000 grit and above fine-grained sandpaper.
- For this tutorial, I used 2500 grit directly and then 3000 grit for a finer finish.

⚠ Careful when choosing a grit, a too coarse sandpaper grit will damage the airpods case

## Step 3

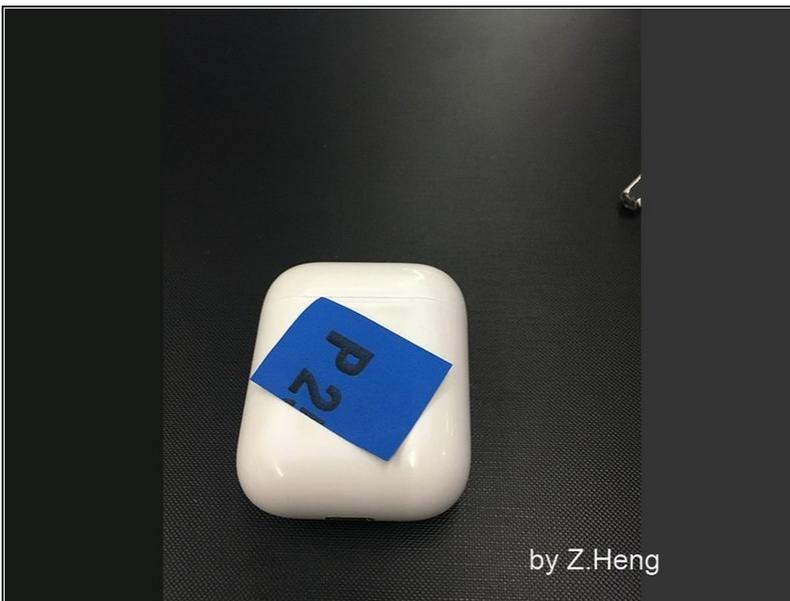

- Cotton wool and medical alcohol are used to clean the surface of the charging case.

## Step 4

- Clean the surface of the charging case with absorbent cotton dipped in alcohol.
- ① Clean up the inside too!

## Step 5

- Wet the surface with absorbent cotton or a little water, and then lightly sand it with 2500-grit fine sandpaper.
  - It can be seen that the more serious scratches have been smoothed out, the polished areas have turned white, and the smooth surface has become matte.
- ① This step can be performed as many times as necessary.

## Step 6

- It has now returned to white, but the surface is still matte.
- ① If you like this matte style, you can stop
- To restore a smooth surface, continue sanding with 3000 grit sandpaper in the same way as in the previous step.
- ① The finer the sandpaper, the smoother it will be.

## Step 7

- Refreshed now!

---

This will give the charging case a refreshed look instead of a dirty, scratched surface.
