

Vornado 133 Compact Air Circulator Grill

Cover Replacement

Replacing the grill cover from your Vornado 133.

Written By: Erin Klein

INTRODUCTION

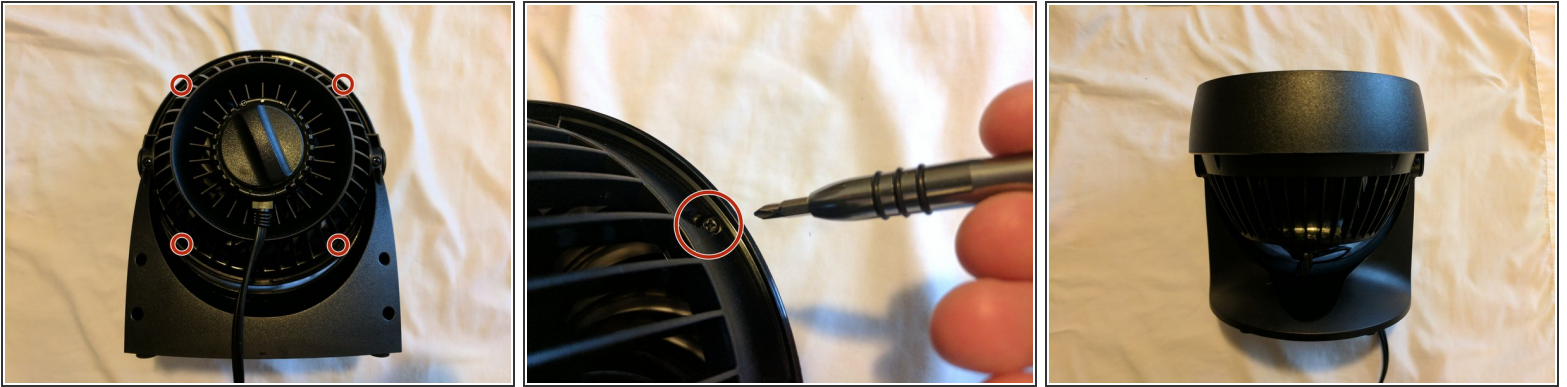

A dirty grill may impede air flow and fan functionality, and a bent or damaged grill may impact the fan blades themselves. This guide will show you how to remove the front grill cover for cleaning or replacement.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Grill Cover

- Use a #1 Phillips screwdriver to remove the four 3mm screws.
- ⓘ It may be difficult to reach the bottom two screws; tilt the fan housing straight upwards for easier access.

Step 2

- Once the screws are removed, turn the fan back over. Use your hands to pull the front grill cover off.

To reassemble your device, follow these instructions in reverse order.
