Step 1 — Battery

- Begin by turning the laptop top-down on a flat surface.

- Use a JIS #1 screwdriver to remove the 4 screws circled in red

- Use a JIS #0 screwdriver to remove the 8 screws circled in orange

- ⓘ Many of these screws are located underneath the rubber pads on the device.

- ⚠ Keep track of the locations of the screws removed for ease of reassembly.
Step 2

- Use a spudger to carefully remove the back cover of the laptop.

- ⚠ Be careful when lifting around the ports and headphone jack to avoid causing damage to these components.
Step 3

- Lift up back cover to access internal components of the laptop.

Step 4

- Remove the screws in the circled areas using the J0 Screwdriver to release the battery.

Step 5

- Lift the battery from the laptop to remove.

- Replace if necessary.

To reassemble your device, follow these instructions in reverse order.
