

BLU Life X8 Battery Replacement

Replace the battery of your BLU Life X8 to try to make it turn on properly.

Written By: Alexander Prasil

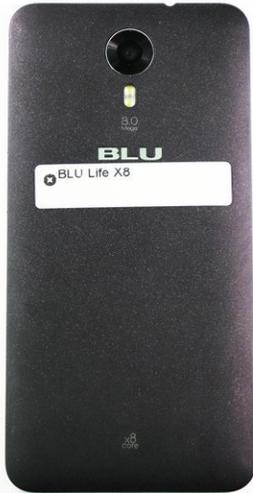

INTRODUCTION

If the phone has trouble turning on or charging properly, the battery may need to be replaced. This guide will explain how to access, remove, and replace your BLU Life X8 battery.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

- Flip the phone over so that the screen is facing down.
- Slide the opening tool between the micro-USB port and the back cover.
- Use the opening tool to create a gap.

Step 2

- Use your thumb to pry off the back panel once the gap is large enough.

Step 3

- Once the back panel is off, locate the indent at the bottom of the battery.
- Use your thumb to slip the battery out of the case.

To reassemble your device, follow these instructions in reverse order.
