INTRODUCTION

Over time the filter may become extremely dirty or it might have been damaged accidentally. This guide will demonstrate how to replace the filter.

TOOLS:

- [Fingers](#) (1)

PARTS:

- [Dust Bin Filter for SmartClean Robotic Vacuums](#) (1)

Step 1 — Filter

- Position the SmartClean so that the Bissell logo is facing towards you backwards.

Step 2

☑ Remember to press down till the cover clicks when reassembling.

- Press down on the cover with the diamonds and lift up.

Step 3

- Flip the handle away from the cover.
- Lift the handle up to open up the dust bin.

Step 4

- Use your finger to hook the filter through the opening near the center of the filter.
- Gently yank the filter out with your fingers.

To reassemble your device, follow these instructions in reverse order.
