

Zebra ZP 505 Platen Replacement

Follow this guide to replace the rubber roller, or platen, of the ZP 505.

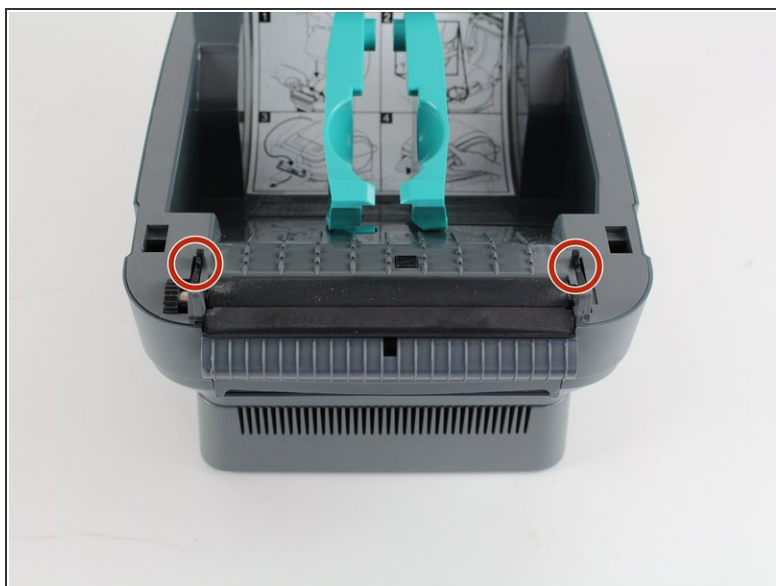

Written By: Sarah Raykhman

INTRODUCTION

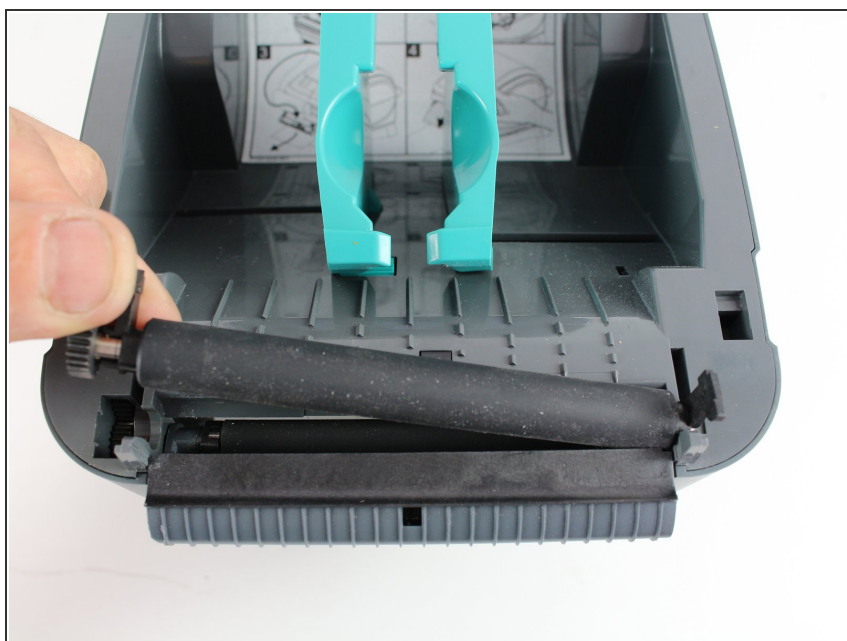

Use the following guide to replace the rubber roller of the ZP 505 with just your bare hands.

Step 1 — Platen

- Orient the printer so the front is facing you.
- Locate the two tabs on opposite ends of the printer.
- Place your fingers on the rollers, push outward and lift upwards.

Step 2

- Lift the platen out of the ZP 505.

To reassemble your device, follow these instructions in reverse order.
