

Protocol Videodrone AP Propeller Guards Replacement

Written By: Serge

INTRODUCTION

This guide will show how to replace the propeller guards. You will only need a #0 Philips screwdriver for this guide.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)

PARTS:

- [Protocol VideoDrone AP Spare Parts](#) (1)

Step 1 — Propeller Guards

- Make sure the drone is powered off.
- Turn the drone over.

Step 2

- Unscrew the top four screws using a Phillips #0 screwdriver.

Step 3

- Unscrew the four secondary screws using the Phillips #0 screwdriver.
- If the screwdriver does not fit in the guard hole, lift and move the guard to the side and unscrew.

To reassemble your device, follow these instructions in reverse order.
