

Samsung Galaxy Tab A 10.1 Battery Replacement

How to replace batteries in the Samsung Galaxy Tab A 10.1.

Written By: Isabella Li

INTRODUCTION

If you are having issues with keeping a charge or your battery is dead, use this guide to properly replace the battery in your Samsung Galaxy Tab A 10.1.

TOOLS:

- [Heat Gun](#) (1)
- [iFixit Opening Tools](#) (1)
- [Phillips #000 Screwdriver](#) (1)

PARTS:

- [Galaxy Tab A 10.1 Replacement Battery](#) (1)

Step 1 — Back Panel

- Have the front of the device facing you.
 - Begin near one of the curved edges of the device (see photo two for visual example).
 - Place a plastic opening tool between the front and back panels.
- ⚠ If a plastic opening tool doesn't work, using a metal spudger may work, but it may damage the plastic on the device.
- ⚠ Remember to remove the micro SD card (if present) before you begin.

Step 2

- Once the plastic opening tool is fully inserted, wedge it around the device's edges to separate the panels.
- Lift the back panel off of the device.
- ⓘ The back panel will make a clicking noise while being lifted off of the device.

Step 3 — Disconnecting the battery

- Remove the adhesive film and flip up the retaining flap on the ZIF battery connector.
- Slide the orange battery ribbon cable out of the ZIF connector.

Step 4

- Remove the adhesive film, lift the retaining tab and withdraw the white speaker ribbon.

Step 5

- Lift the retaining tab and withdraw the black LCD ribbon.
