

# Asus Q550L Heatsink & Fan Replacement

This guide teaches you how to replace the heatsink & fan in an Asus Q550L laptop.

Written By: Joseph Sctbunio

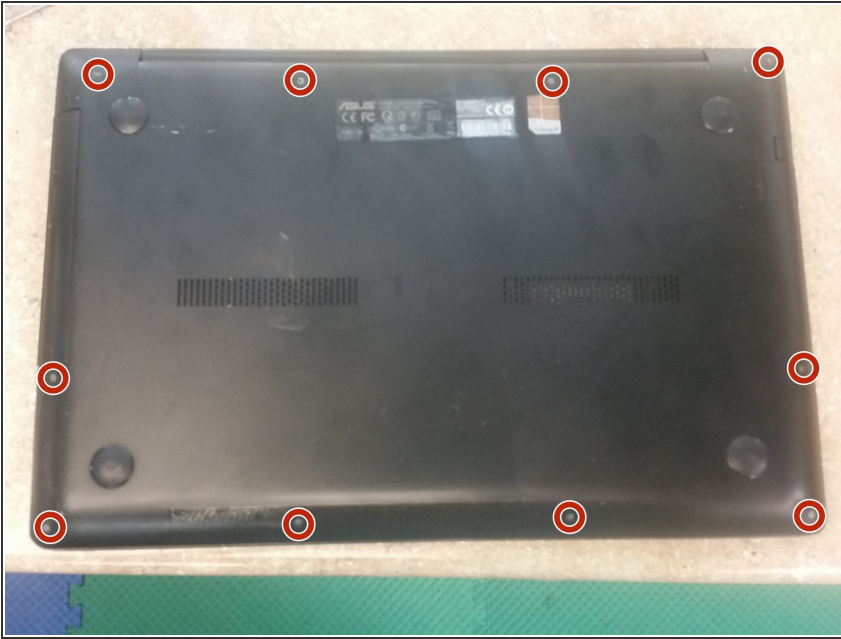

## TOOLS:

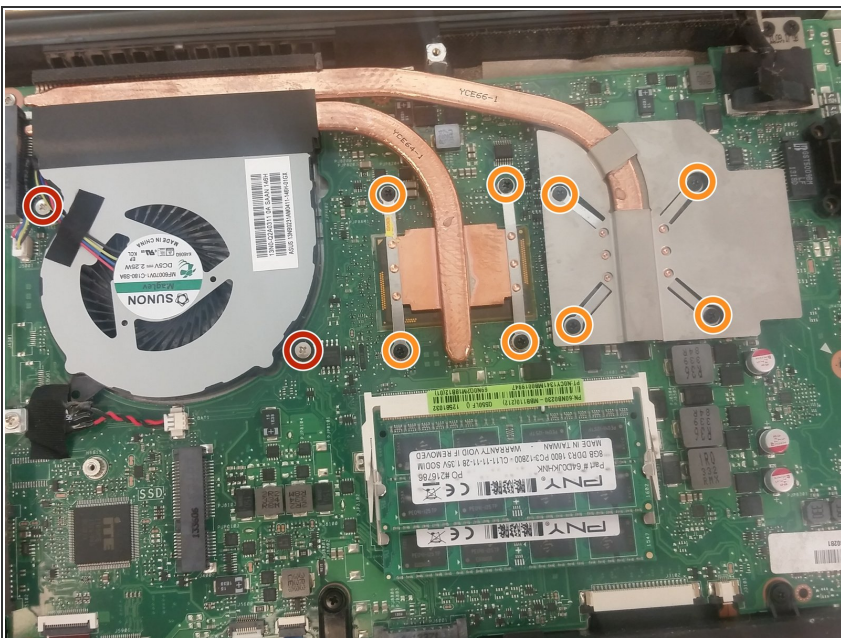

- [Essential Electronics Toolkit](#) (1)
-

## Step 1 — Remove bottom cover

- Remove the ten Torx T5 screws securing the bottom cover to the rest of the laptop.

## Step 2 — Remove heatsink & fan

- Remove the two Philips screws securing the fan.
- Remove the eight Philips screws securing the heatsink assembly.
- Clean the CPU and replacement heatsink assembly with alcohol and a Q-tip, and you're done!

To reassemble your device, follow these instructions in reverse order.
