Asus Q552UB-BHI7T12 RAM Replacement

The replacement of the Asus Q552UB-BHI7T12 RAM.
Written By: Alexander Boettcher

INTRODUCTION

RAM (Random Access Memory) is also known as system memory. Generally, 12 GB (8 GB and 4 GB) RAM is given by default with the Asus Q552UB-BHI7T12 Laptop. But users can upgrade up to 16 GB using two 8 GB RAMs. Normally the user needs to change the RAM when its performance degrades therefore the system becomes slower. But before changing the RAM, an Asus Q552UB-BHI7T12 user needs to confirm [here](#) that it's actually the RAM which is causing the problem, not the CPU or Graphics Card.
Use this simple guide to replace your Asus Q552UB-BHI7T12 RAM. Follow these three simple steps which will take no longer than 10 minutes.

Step 1 — RAM

- On the bottom of the laptop, gently pull the wire connecting the battery to the motherboard

Step 2

- Gently lever the two arms securing the RAM toward either side of the laptop, while holding the RAM in place with your thumbs.

Step 3

- Carefully slide the ram with your index fingers from in between the white tabs.

To reassemble device, follow the instructions in reverse order.
