### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Spudger](#) (1)

### PARTS:

- [Replacement LG K7 rear camera](#) (1)
-

## Step 1 — Battery

- Flip the LG K7 over so that the back of the phone is facing up.
- Locate the small notch on the bottom left side of the phone.

## Step 2

- Insert a plastic opening tool into the notch and lift the back cover upward while holding the bottom portion of the phone down to remove it.

### Step 3

- Remove the battery.

### Step 4 — Rear Phone Camera

- Located to nine 3.4 mm screws that keep that keep the phones rear housing in tacked.
- Using a Phillips 00 screwdriver remove all nine 3.4 mm screws.

## Step 5

- Turn the phone over so the screen is facing up
- Insert your plastic opening tool between the midframe and front panel assembly on the side of the phone.
- Slide the plastic opening tool down the seams carefully to separate the screen from the rest of the phone housing.

## Step 6

- Locate the ribbon cable that holds the camera's ribbon cable in place.
- Carefully remove the camera's ribbon cable from the motherboard using the plastic removal tool.
- Holding the camera ribbon you just released pull upwards and the camera should release from the case.

To reassemble your device, follow these instructions in reverse order.
