# ASUS X550LB-DS71 Display Panel Replacement

This guide will show the steps needed to replace the display panel in ASUS X550LB-DS71.

Written By: Nathan Dyer

## INTRODUCTION

The display monitor is an output device which presents data on the screen. It is what allows the user to see what inputs they are putting into the device.
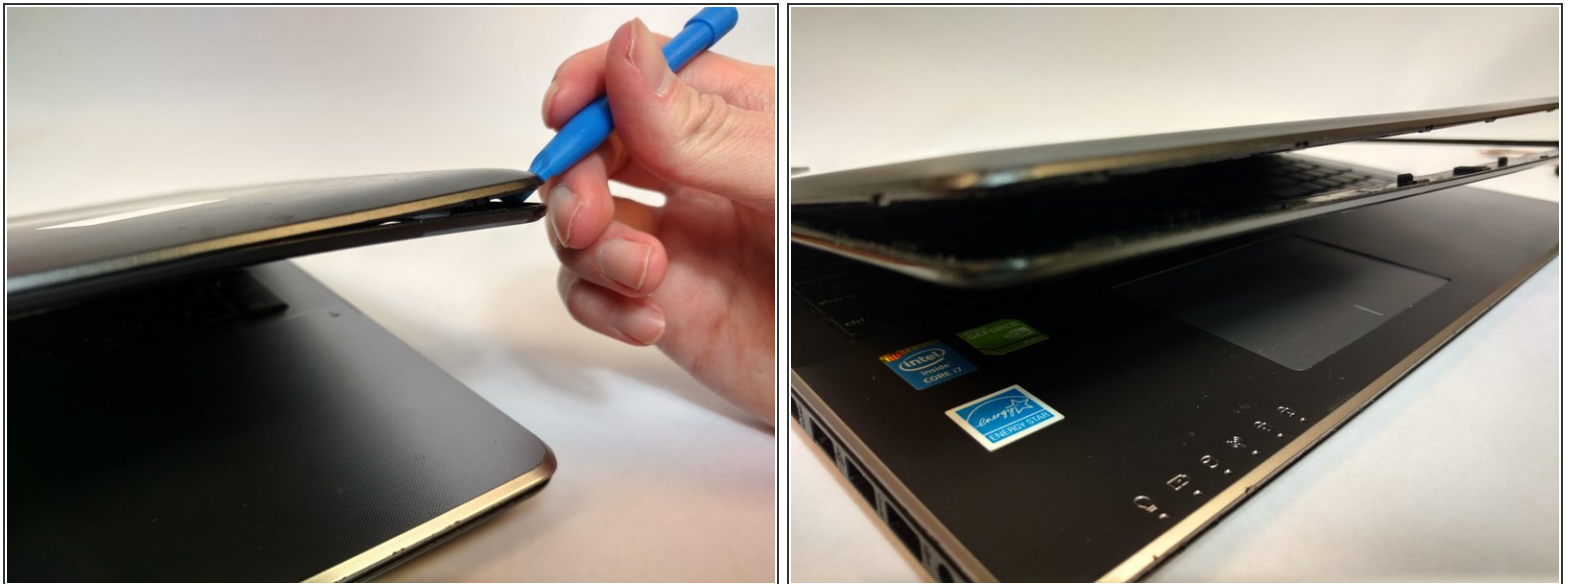

## 🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

## Step 1 — Display Panel

- Flip open the laptop with the screen facing towards you.

- Using the plastic opening tool, remove the square tape from the marked locations.

- Use the Phillips #0 Screwdriver to remove the two 2mm screws from those locations.
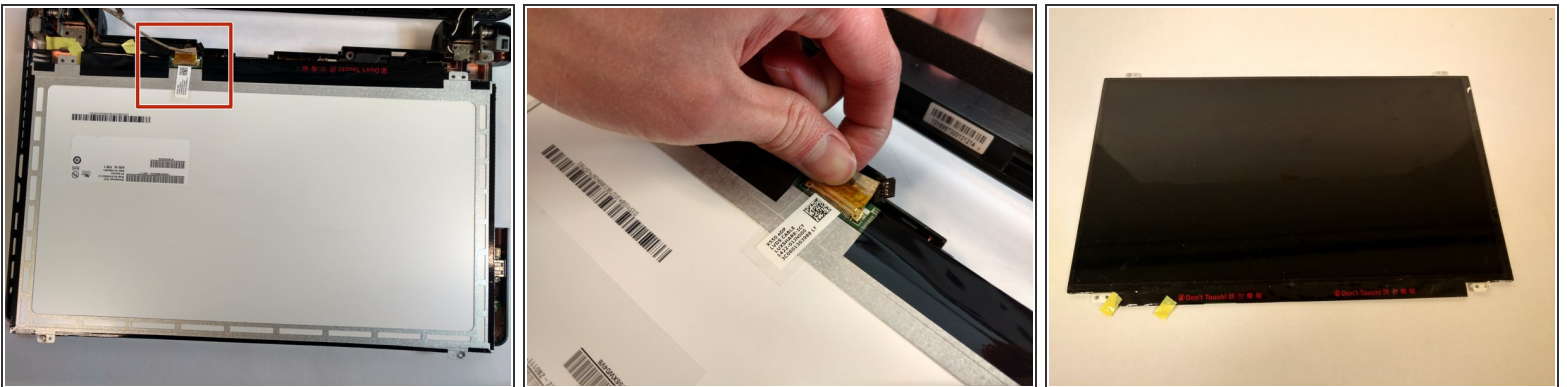

## Step 2

- Using the plastic opening tool, open the front cover of the laptop.

- (i) It is recommended that you start from a corner and run the tool along the edge of the cover.

- ⚠ Be careful not to bend or crack the cover.

## Step 3

- Peel off the tape located on the left and right side of the display monitor.

- Use the Phillips #0 screwdriver to remove the screws at the marked locations in each corner of the display.

## Step 4

- Place the display monitor face down to expose the ribbon connector.

- Remove the ribbon connector to separate the display monitor from the rest of the device.

To reassemble your device, follow these instructions in reverse order.
