

Vornado Duo Circuit Board Replacement

Vornado Duo step by step guide to switch the fuse in the power cord plug.

Written By: Tyler Pettenger

INTRODUCTION

In this replacement guide, step by step instructions will show how to replace the circuit board located inside of the Vornado Duo.

TOOLS:

- [Phillips #2 Screwdriver](#) (1)
- [Soldering Iron](#) (1)

PARTS:

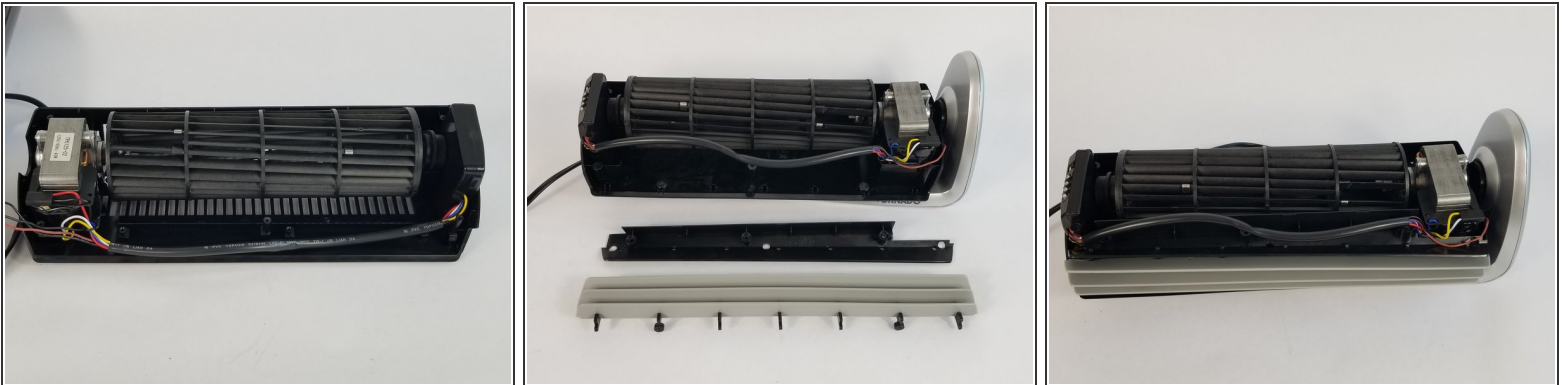

- [Vornado Duo Circuit Board](#) (1)

Step 1 — Circuit Board

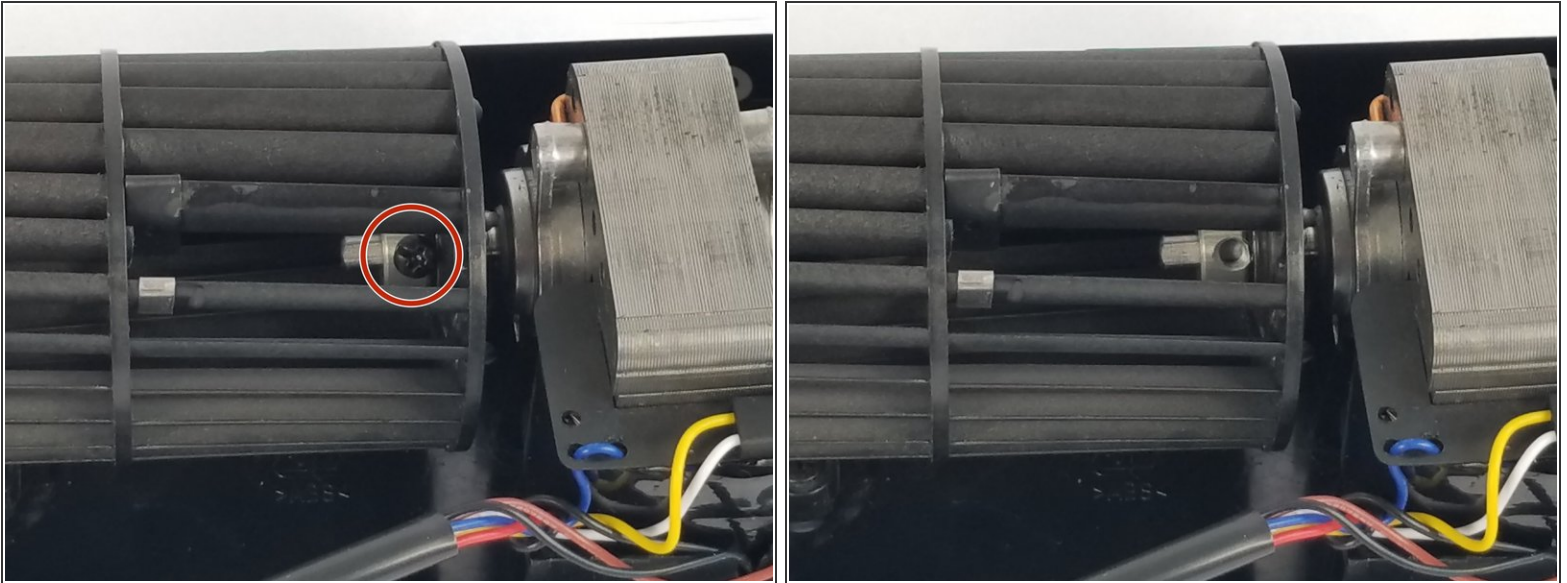

- Start off by using a Philips #2 screwdriver to remove all 8 10mm exterior screws on the rear of the device.

Step 2

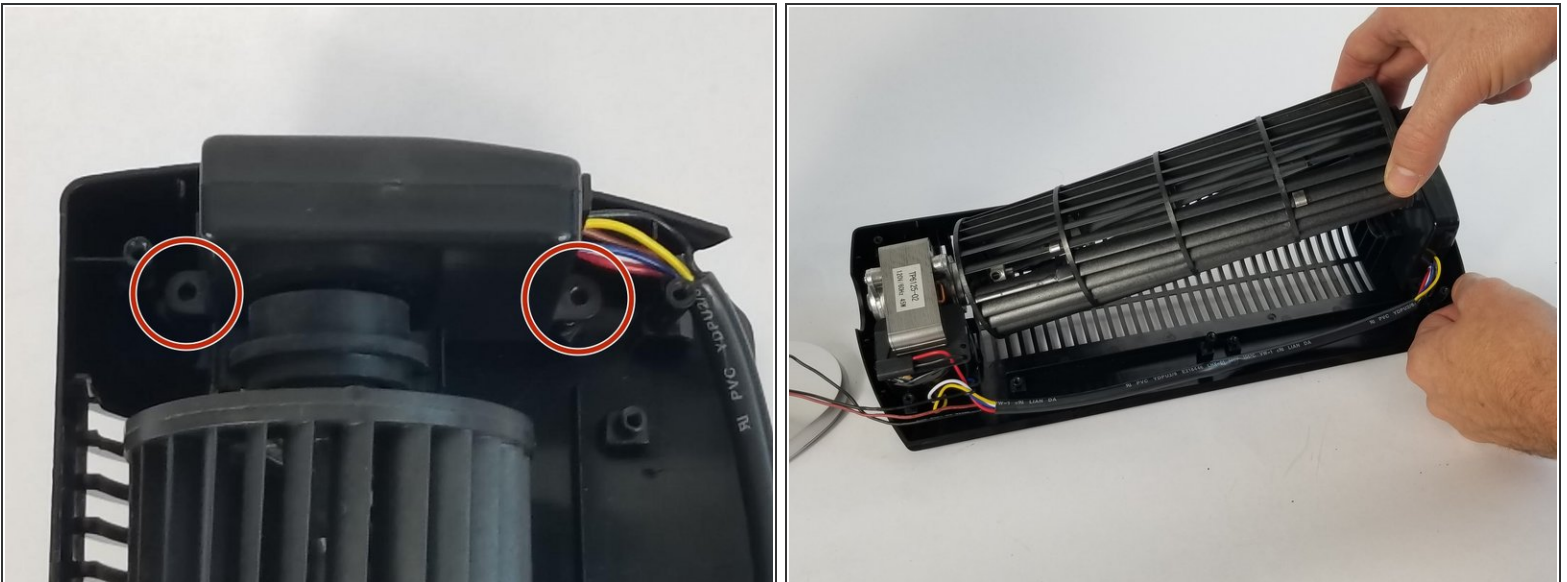

- Carefully take front panel off.

Step 3

- Loosen 5 mm screw at bottom of fan blade located inside the blades.

Step 4

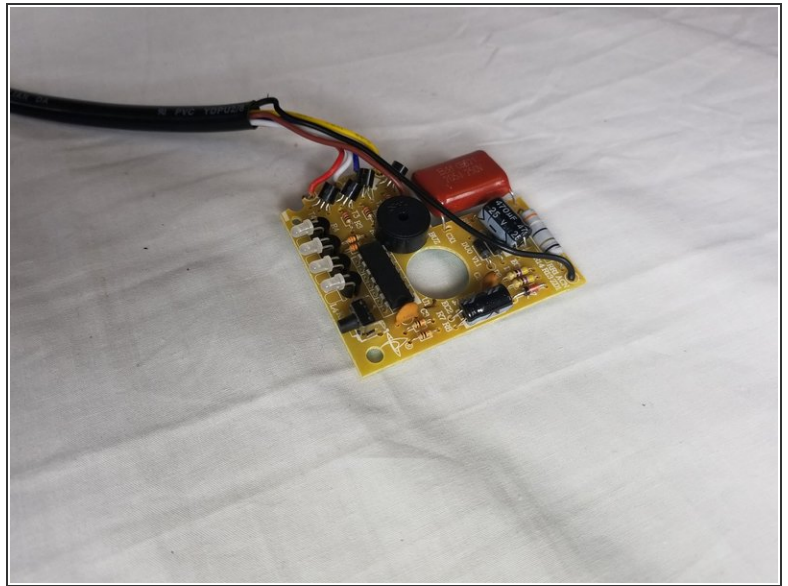

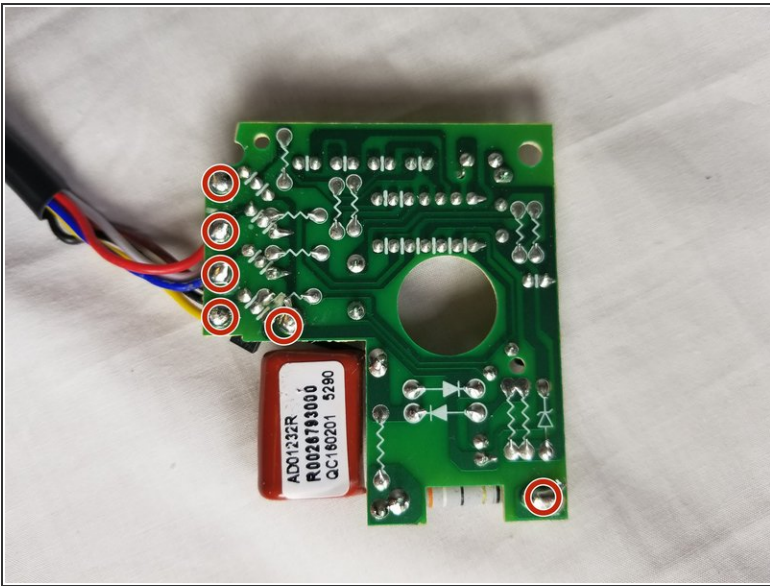

- Remove fan blade after unscrewing top 2 screws located on each side of the covered board.

Step 5

- Remove cover from board.

Step 6

- Unsolder the circled spots on the mother board and resolder each wire to corresponding spot.

To reassemble your device, follow these instructions in reverse order.
