INTRODUCTION

This simple guide does not require any tools. To replace a filter, a new or washed filter is needed.

Step 1 — Filter

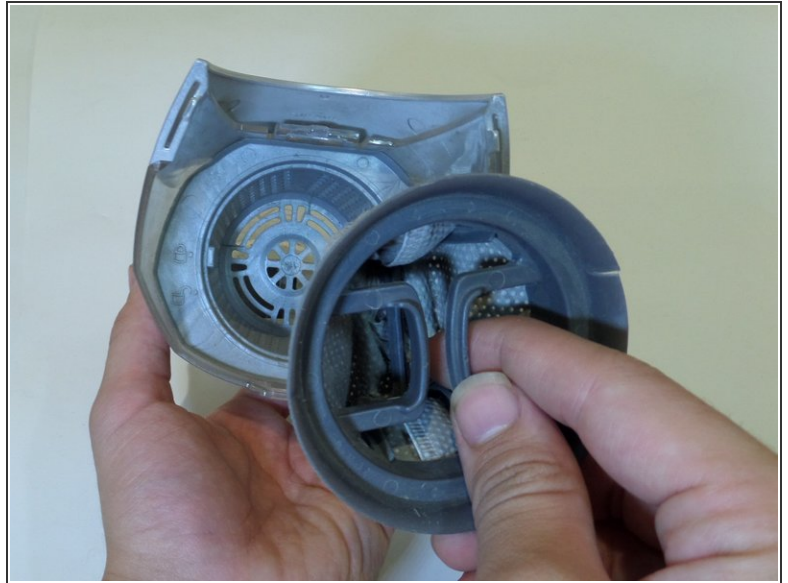

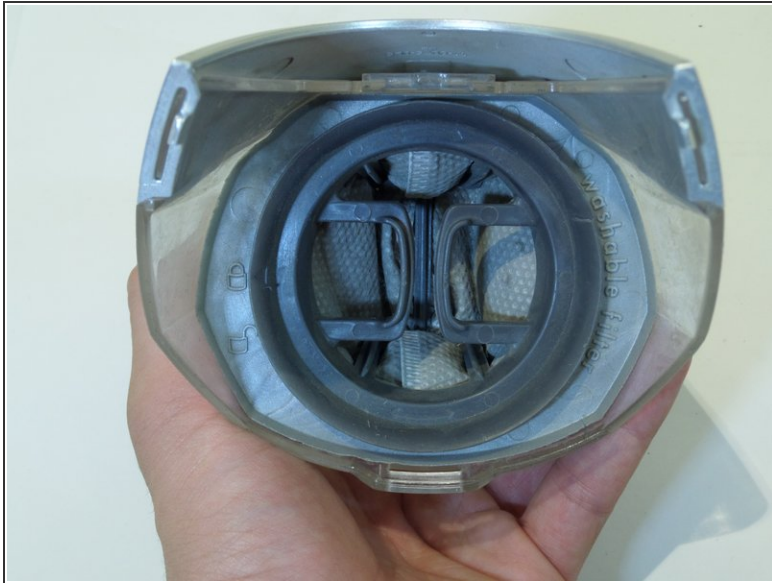

- Grab the handle of the handheld vacuum.
- With great force, remove the handheld vacuum from the entire unit.

Step 2

- Push the silver button to open the dirt container.

Step 3

- Grab the clear part of the vacuum.
- Pinch the clips and turn counter-clockwise, to unlock filter.
- Remove the filter to clean or replace

To reassemble your device, follow these instructions in reverse order.
