

Protocol Dronium III AP Battery Pack Replacement

This guide provides instructions for the removal and reinstallation of the drone battery pack for charging or replacing the battery pack as needed.

Written By: Steven Mooers

INTRODUCTION

This guide provides instructions for the removal and re-installation of the drone battery pack for charging or replacing the battery pack as needed. No tools are needed to complete this task.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Drone Battery Pack

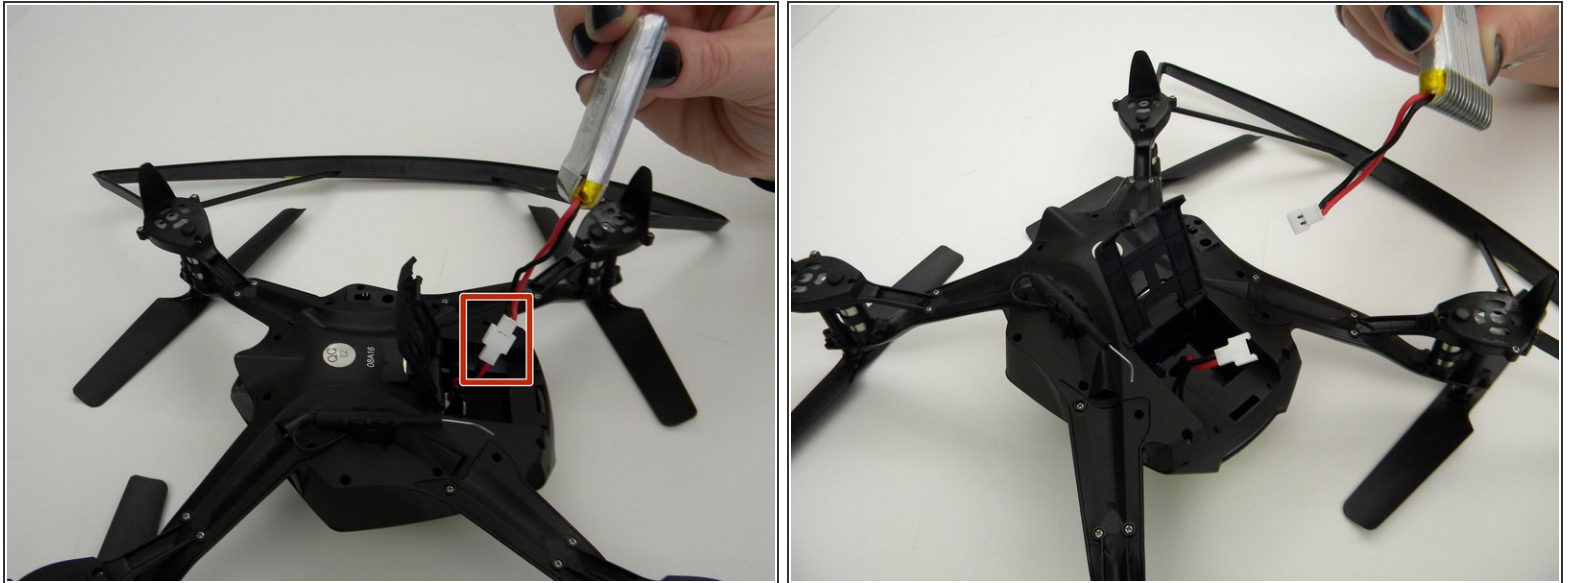

- ⚠ Ensure the drone is powered off.
- Press in and lift battery compartment cover.
- ⓘ A soft pry tool may be used for easier access.

Step 2

- Remove battery pack from body of drone.

Step 3

- Disconnect white connectors between the battery pack and drone.

To reassemble your device, follow these instructions in reverse order.
