Step 3

- Gently wedge the spudger in between the bottom of the device and the keyboard, and carefully pry the cover open. Then, carefully lift up on keyboard.
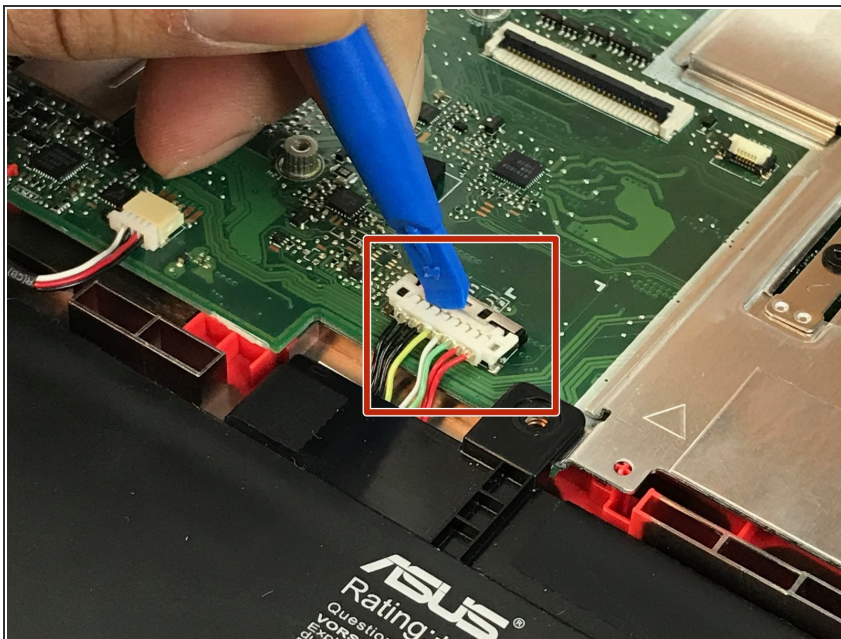

Step 4

- ⓘ Gently detach connecting cables

- Carefully flip up the large black tab.

- Carefully flip up the small white tab.

- Remove its corresponding black cable.

- Remove the corresponding white cable.

- ⓘ The keyboard will be fully detached at this point.

Step 5

- Using the JIS-J0 screwdriver, unscrew and remove from the battery:

- (6) Six 6mm screws

Step 6

- Using the plastic opening tool, gently push the connector tab away from the battery to detach the cable.

- (i) The battery will be fully detached at this point. Carefully lift it out of the device.
