

# Qualcomm Snapdragon 800 Mobile Development Antenna Replacement

Use this guide to replace the Qualcomm Snapdragon 800 Mobile Development Tablet's antennas.

Written By: Omar

 **TOOLS:**

- [Spudger](#) (1)
  - [Phillips Head Screwdriver: Size PH1](#) (1)
-

## Step 1 — Battery

- Locate your device.
- Flip device onto its back.

## Step 2

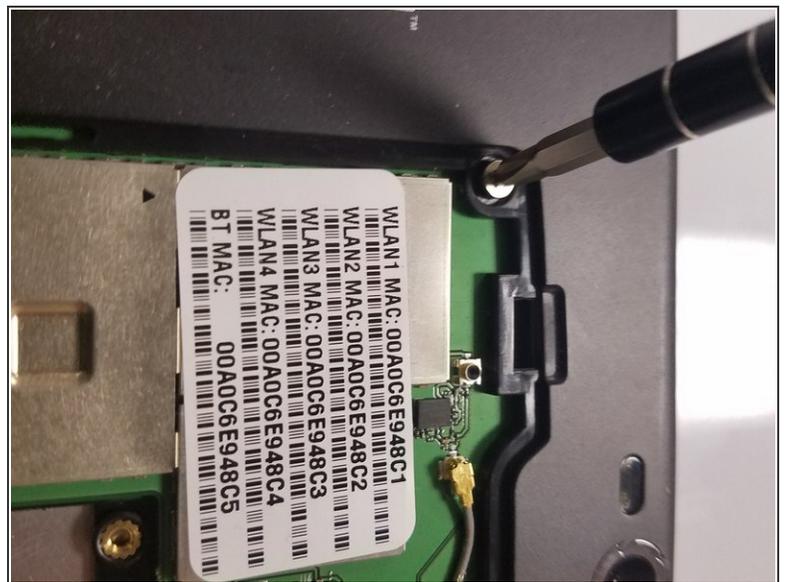

- Remove the tablet's back cover.

## Step 3

- Locate the battery and remove it.
- If you wish to replace the battery you can do so here.

## Step 4 — Back Panel

- Use the Phillips PH1 screwdriver to unscrew the five 4x2.5mm screws that hold the back cover.

## Step 5

- Pop out the back cover.

## Step 6 — Antennas

- After removing the panel and the battery, your tablet should look like this.

## Step 7

- Locate the tablet's antennas.
- Remove the two 3x2.5mm screws holding them down.

## Step 8

- Remove antennas and replace them as needed.

To reassemble your device, follow these instructions in reverse order.
