Step 1 — Back Cover

- Locate the opening line between the cover and the device. Then locate the groove near the charging port.
Step 2

- Use a metal spudger to separate the back cover from the front touch screen.

- To do this, place the metal spudger in between the groove near the charging port of the device to unlatch the first clip.

Step 3

- Continue to separate all of the clips around the device until the back cover comes off completely.

Step 4 — Volume Controls

- After taking out the back cover, locate the black flap.

- Open the black flap with the plastic opening tools.

- ⚠️ Be careful not to break the flap when you open it.

Step 5

- Once the tab is released, use the angled tweezers to take out the tab.

⚠️ Be careful not to scratch the tab.

Step 6

- Use the angled tweezers to pull the volume controls out and replace it with a new one.

Step 7 — Battery

- Locate the white plug next to the battery.

- Use your fingers to pull off white plug that connected to the battery.
⚠️ Be careful not to pull or break the wires on the bottom.

Step 8

- The battery should only be connected to the LCD by adhesive tape.

- Using force, carefully remove the battery while holding the LCD in place.

Step 9 — LCD Screen

- Open the three black flaps located on each side of the motherboard.
Step 10

- Then detach each of the three tabs from the LCD screen.

Step 11

- Using a Philips 0 Screwdriver, remove the screws connecting the speaker to the motherboard.

- Remove black plastic speaker holder.

Step 12

- Remove the gray tape connecting the motherboard to the metal slate.

- Use a spudger to separate the metal slate from the front touch screen.

Step 13

- Carefully slide out the metal slate and LCD screen from underneath the motherboard.

Step 14

- Flip over the metal slate and separate the LCD screen from it.

To reassemble your device, follow these instructions in reverse order.
