## **TOOLS:**

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Rotor Blade

- Place the drone with the top side facing up.
- Remove the blade cover.
- Remove the rotor blade.

## Step 2 — Lockstitch

- Unscrew the 1cm screw holding in the blade lockstitch with the Phillips 0 Screwdriver.
- Remove the blade lockstitch.

### Step 3 — Lower and Upper Body

- Lay down the drone so the battery side is facing up.
- Unscrew all 5 .8cm screws on each arm of the drone with the Phillips 0 Screwdriver.
- Repeat previous bullet for each arm (20 screws in total).

### Step 4

- Using a bit of force, gently pull apart the lower and upper bodies.
- Keep going until both parts are completely separated.

To reassemble your device, follow these instructions in reverse order.
