## INTRODUCTION

This guide will help you remove the RAM in the HP Pavilion 15-ab165us laptop.

### TOOLS:

- [Spudger](#) (1)
-

## Step 1 — Battery and Back Cover

- Flip the computer over so that the bottom cover is facing you.
- Slide the two locks to the "unlock" position and remove the battery.

## Step 2

- Remove the two 8mm screws underneath with a Phillips #1 screwdriver.
- Use a plastic opening tool to remove the plastic feet.

## Step 3

- Remove the two plastic tabs with a metal spudger.

## Step 4

- Remove the sixteen 8mm screws that hold the bottom cover with a Phillips #1 screwdriver.

## Step 5

- Pull the Optical Drive out.

## Step 6

- Remove the 3mm screws that were hidden under the Optical Drive with a Phillips #0 screwdriver.

## Step 7

- Flip the computer back over.
- Use a plastic opening tool to release the clips holding the keyboard section in place.

## Step 8

- Close the lid and pull the screen and keyboard section up and away from the disconnected bottom cover.
- ⚠ The hard drive is NOT screwed into place on the underside of the keyboard section.

## Step 9 — RAM

- Locate RAM.

## Step 10

- Pull the tension arms away from both sides the RAM.

## Step 11

- Pull RAM away from the RAM slot.

## Step 12

- Repeat this process for the next stick of RAM.

To reassemble your device, follow these instructions in reverse order.
